

NE 24
Final Project Presentation Rubric

You will give a presentation in class during the last week (Monday, April 24). It will only be 5(?) minutes long. You can

- have slides (in which case send them to me before class so they'll all be loaded on to one laptop),
- just show the project cite and your pull request,
- just talk, or
- whatever you think best conveys the information.

The rubric for evaluating the presentation:

Category	Possible Points	Earned Points
Explanation of thing you contributed to (what is the project to which you submitted the pull request; why do you care about it?)	10	
Explanation of what you contributed (what did you actually do?)	10	
Biggest lesson learned	5	
Good presentation skills: eye contact, volume, clarity of slides (if applicable), etc.	10	
Appropriate presentation length	5	
<i>Total</i>	<i>40</i>	

*You will also need to send me a link to your pull request and/or final code contribution by **midnight on April 28**. This will be worth an additional **20 points**.*
